

Red Hat OpenShift AI

Try it

Talk to a Red Hatter

What is Red Hat OpenShift AI?

Red Hat® OpenShift® AI is a flexible, scalable MLOps platform with tools to build, deploy, and manage AI-enabled applications. Built using open source technologies, it provides trusted, operationally consistent capabilities for teams to experiment, serve models, and deliver innovative apps.

OpenShift AI (previously called Red Hat OpenShift Data Science) supports the full lifecycle of AI/ML experiments and models, on-premise and in the public cloud.

Welcome to Red Hat. What brings you here today?

1

Bring AI-enabled apps to production faster

Combine the proven capabilities of Red Hat OpenShift AI and Red Hat OpenShift in a single enterprise-ready AI application platform that brings teams together. Data scientists, engineers, and app developers can collaborate in a single destination that promotes consistency, security, and scalability.

OpenShift AI enables data acquisition and preparation, model training and fine-tuning, model serving and model monitoring, and hardware acceleration. With an open ecosystem of hardware and software partners, OpenShift AI delivers the flexibility you need for your specific use cases.

Features & benefits

Less time managing AI infrastructure

Provide your teams with on-demand access to resources, so they can focus on exploring data and building automation. Additional time-saving benefits include built-in security and

Red Hat tracks, integrates, tests, and supports common AI/ML tooling and model serving on our Red Hat OpenShift application platform, so you don't have to. OpenShift AI draws from years of incubation in Red Hat's Open Data Hub community project.

Flexibility across the hybrid cloud

Offered as either self-managed software or as a fully managed cloud service on top of OpenShift, Red Hat OpenShift AI provides a secure and flexible platform that gives you the choice of where you develop and deploy your models—whether on-premise, the public cloud, or even at the edge.

Leverage our best practices

Red Hat Consulting and Red Hat Open Innovation Labs provides services that allow you to install, configure and use Red Hat OpenShift AI to its fullest extent.

Learn best practices and build your own ML pipeline project using DevOps and MLOps through Red Hat's proven methodology. Whether you're seeking guidance on building a sample model, or looking to move beyond model experimentation to develop strategies for employing models to production, our comprehensive Services will provide support and mentorship for building modern cloud applications.

Scaling Model Serving with Red Hat OpenShift AI

Models can be served for integration into intelligent applications on-premise, in the public cloud or at the edge. These models can be rebuilt, redeployed, and monitored based on changes to the source notebook.

Innovate with open source and hybrid cloud

Red Hat OpenShift AI integrates open source tools with Red Hat's AI/ML partner ecosystem to accelerate project development and enhance platform capabilities. Plus, with Red Hat's hybrid cloud approach you can eliminate cloud provider lock-ins and minimize vendor lock-ins.
